CAREER OBJECTIVE Motivated and detail-oriented web developer with comprehensive knowledge in JavaScript, HTML, CSS, React, Node.js, Express.js, and MongoDB. Seeking a challenging role in a dynamic company to apply my technical skills and contribute to innovative projects in full-stack web development.

TECHNICAL SKILLS
Frontend: JavaScript, HTML, CSS, React, Tailwind CSS
Backend: Node.js, Express.js
Database: MongoDB
Other tools: Git, GitHub, Netlify, Vercel, Firebase

PROJECTS **Blood Management Application- RedLove** [Live link](#) | [Github Client](#) | [Github Server](#)

- The Blood Donation Application is a platform designed to facilitate blood donation activities by connecting donors with those in need of blood. It provides a user-friendly interface for registration, donation requests, donor management, content management, and role-based access control. The application is built using the *MERN stack (MongoDB, Express.js, React, Node.js)*.

Tourist Management - TourSpotter [Live link](#) | [Github Client](#) | [Github Server](#)

- TravelSpotter is a web application designed to help travelers explore exciting destinations in Southeast Asia and beyond.
- Whether you're planning your next adventure or simply looking for inspiration, TravelSpotter offers a user-friendly platform to discover, share, and organize your travel experiences.
- The application is built using the *MERN stack (MongoDB, Express.js, React, Node.js)*.

Blog Website - BlogZone [Live link](#) | [Github Client](#) | [Github Server](#) Personalized Homepage: Discover fresh content and follow your interests with a customizable homepage.

- Interactive Blogging: Engage with posts, add them to your wishlist, and discuss them in the comments.
- The application is built using the *MERN stack (MongoDB, Express.js, React, Node.js)*.
